

HOTEL

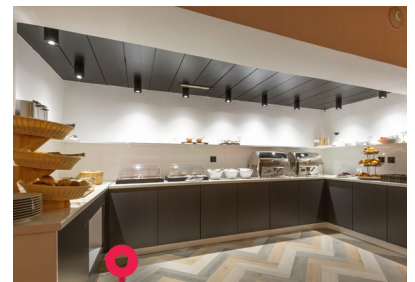

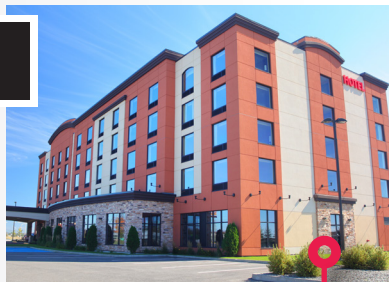

ASSET  PROTECTION = YOUR  REPUTATION

CUSTOMER REVIEWS

Frequent departure and arrival of guests provide pests ample opportunity to infest hotels. The importance of providing guests with quality food, clean rooms & common spaces free from rodents has become exponentially more important in today's social-media world.

Place 24/7® iQ™ traps inside every entry door. Place T-Rex® iQ™ traps in hard to reach locations, such as in dropped ceilings, as that is where rodents are traveling. Traps only need to be serviced if a rat is captured in the trap, cutting down on service time and guest disruptions.

Protecta EVO EXPRESS iQ

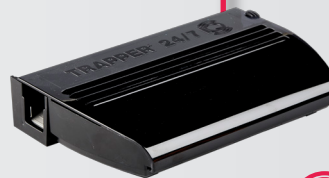

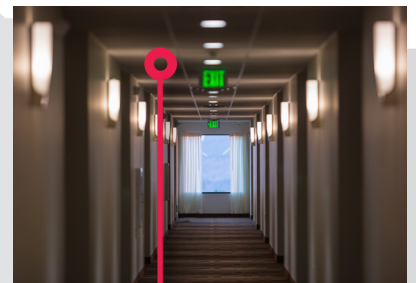

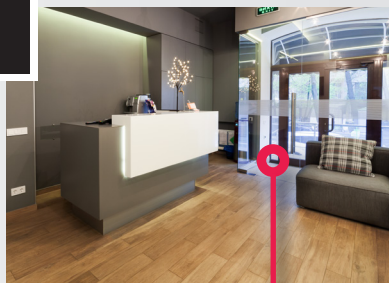

TRAPPER 24/7 iQ

PROTECTING YOUR BUSINESS

Rodent control can prove particularly difficult in hotels due to the sheer amount of access points. Knowing with certainty when and where rodents are traveling will ensure your property is protected from the damage and disease spread by rodents.

Placing Express® iQ™ trays in bait stations along the exterior of the building will highlight major rodent highways and points of access to inside. Place 24/7® iQ™ traps underneath areas where there is food, such as kitchens, coffee bars and breakfast areas, to keep rodents away from your customers and employees.

TRAPPER 24/7 iQ

TRAPPER T-Rex iQ

Instead of time spent checking rodent devices with no activity, pest control experts can spend their time solving problems.

WORK SMARTER, NOT HARDER.
